- Azure

Experience

Junior Software Developer

October 2024 – April 2025

Nextshift llc.

Remote

Hired by mulit-national healthcare technology innovation group to assist in the development, maintenance, and implementation of telemetry programs used in a multitude of APIs for one of the company's largest clients.

- Used JavaScript, Node.JS, and OpenTelemetry to add and maintain logs and metrics to existing node.js apis for clients
- Used Javascript, Node.js and OpenTelemetry to create libraries to facilitate boilerplate logging and metrics using OpenTelemetry
- Used Yaml to create pipeline configurations for libraries and APIs being hosted and deployed on Jenkins Pipeline Manager

Software Engineer Contractor

July 2024 – September 2024

Leverage Software Group

Remote

Partnered with the newly founded custom software development group to assist in the development of software applications used by the group's clients to manage their internal systems.

- Used Razor and ASP.NET MVC to add features to Web Applications used by clients of the company
- Used SQL Server to manage databases for client applications

Junior Software Developer

December 2023 – July 2024

Pacesetter Claims

Remote

Joined the nationwide insurance claims adjuster company to assist in the development of a time, work, and administration management system made in house by following requirements provided by users and their managers.

- Used Blazor, SQL Server, and Microsoft Azure to build and improve an application used by insurance claims adjusters to track time and claims.
- Used End to End, integration, and unit testing techniques to maintain and secure multiple facets of a large application
- Used Mediatr and Entity Framework to modularize and automate database access and control

- Created Azure CI/CD Pipelines for deploying web application environments

Junior Software Developer

May 2023 – December 2023

amshot

Oklahoma City, OK

Hired by the small IT infrastructure startup to develop and maintain multiple applications, systems, and websites for the company's clients by following and implementing the clients requirements in a timely manner.

- Used C#, Javascript, HTML, CSS, SQL Server, React, ASP.NET MVC, and Angular to create and maintain applications used by clients
- Worked on multiple client projects simultaneously, balancing workload and shifting priorities
- Used Agile principles to manage time between multiple clients to ensure deadlines and expectations were met

IT Intern

May 2022 – August 2022

Devon Energy

Oklahoma City, OK

Recruited by the large oil and gas exploration and production company to assist in the development of an oil well and site maintenance reporting system and develop career skills with professionals within the company.

- Assisted in the development and maintenance of a work order portal for all on-site oil rig operators using Angular, .NET, and SQL to fix bugs and add new features.
- Partnered with a large team of developers to ensure the smooth and streamlined development of a large scale, nationwide application with a large number of users.
- Developed professional skills for career and personal growth, including but not limited to, interview skills, resume writing, and networking skills.
